

As a paying subscriber to satellite radio,I feel that it is a intrusion of my rights for the NAB to attempt to limit or delete the services that I pay for.I am a over the road truckdriver and have found that the information that I receive from my satellite radio(traffic and weather info.)have been more than helpful while I am performing my job. Also there is no comparison to regular AM & FM programming with the variety and quality of the programming on satellite radio. I strongly and respectfully urge the FCC to reject the NAB petition 04-160 and to allow me to receive the kind of programming that I want and pay for.
respectfully yours, Charles T. Starritt Sr.
